

# MODELO DA SUA PLACA-MÃE VIA PROMPT DE COMANDO

1) WinKey + R abre o 'Executar' do Windows => Digite 'cmd' (sem aspas) e aperte Enter;

2) Digite: **wmic baseboard get product,Manufacturer,version,serialnumber**.  
A ferramenta WMIC (Instrumentation Command-line) mostra o modelo de sua placa-mãe;

```
C:\> Administrador: Prompt de Comando  
C:\Windows\system32>wmic baseboard get product,Manufacturer,version,serialnumber_
```

3) Pronto! Fabricante, modelo, serial e versão... Rápido e fácil.

```
C:\> Administrador: Prompt de Comando  
C:\Windows\system32>wmic baseboard get product,Manufacturer,version,serialnumber  
Manufacturer Product SerialNumber Version  
MEGAWARE MW-H61H2-M2 00000000 01/18/2012 - MEGASLP
```
